[KNOB-Attack, concept error in Bluetooth? - AirID is safe!](#)

[Jan Wendenburg](#) posted on Aug 21, 2019

AirID has an additional, highly secure AES256 encryption and is secure. AirID's security is independent of Bluetooth standards - KNOB attack has no chance. Düsseldorf, 21.08.2019, certgate, one of the leading specialists in mobile IT security and authentication, emphasizes that AirID is not affected by the KNOB attack. The Knob-Attack (Key Negotiation Of Bluetooth <https://knobattack.com/> <https://knobattack.com/>) was presented by researchers from the Universities of Singapore,...
