

AirID Version 2 - General Availability

AirID Version 2 has achieved general availability!

AirID Version 2 provides

- an improved case design, including TPU bumper for increased durability
- 4-way bumper hangers for landscape and portrait oriented smart cards
- chip double-header to support front- & backside printed smart cards
- Bluetooth Low Energy 4.2, improved speed & security

We are glad to announce that AirID Version 2 Business Edition is now general available for general delivery. In December 2018 & January 2019 a few hundred units have been delivered to selected clients prior GA. Now, 21 Jan 2019 AirID Version 2 Business Edition is general available for all clients.

For testing & evaluation, AirID Version 2 Evaluation Kit is available through certgate online store.
