

A1 - Remove pairing information from AirID

Remove all pairing information

To remove all stored pairing information from AirID, use the control element to select **Settings** **Reset keys** **Reset all**.

Remove specific pairing information

To remove specific pairing information from AirID, use the control element to select **Settings** **Reset keys** **Reset "device name"**.

The pairing information can also be removed via AirID Central App. To do this, go to the paired devices view, select the corresponding device from the list and click **Delete**.
